

Utageo 2.0 Vocal Ripper 65

This is a program for converting the vocals of songs into text using libtspico, and for converting the texts of songs into sound using gettext-tools. This program does not support multi-channel audio, use the old version. There are no other differences between these two versions. This is a new version of Utageo2. The vocal ripper part is improved to be able to extract vocals from songs with more than 2 channels, such as VOCALOID songs. The user interface has been changed, and extra functions have been added.

(=VOCALOID) [English] (=VOCALOID) [Italiano] (=VOCALOID) [Deutsch] (Old version of Utageo2) [English]

An article was written in the non-technical language for introducing this program. It has about 50 words. A detailed explanation is given in the technical language. This is for people who are interested in programming. It has about 4000 words.

Utageo2 was reviewed on PuniePuri, a Japanese software review website.

Utageo2 was reviewed on Kansai Soft Bank Labo, a Japanese software review website. The reviewer said that this program is perfect because it can convert many languages to Japanese, it can also convert MIDI files to sound files, and it is open-source so it can be improved by the users themselves if they need any improvements. The reviewer of 5pb said that this program is perfect for people who are interested in programming or in converting lyrics of songs into sound.

Utageo2 was reviewed on Getchu, a Japanese software review website. The reviewer said that this program is perfect because it can convert many languages to Japanese, it can also convert MIDI files to sound files, and it is open-source so it can be improved by the users themselves if they need any improvements.
